

DISTRIBUTOR & MOBIL SERV | RIG PARTNERSHIP WINS PRECOMMISSIONING PROJECT RESULTING IN 28,000 GALLONS OF LUBRICANT SALES

SINGLE SOURCE PROJECT MANAGEMENT PAYS DIVIDENDS

By Larry B. Jordan, Sr. Technical Advisor, RIG

INTERNAL USE ONLY

SYNOPSIS

OEM resources for a new paper machine installation were stretched thin during the precommissioning phase. Reaching out through their local distributor, the OEM was able to outsource the entire precommissioning phase to the Mobil Serv | RIG team.

This ensured the machine installation was successful and on time. It also led to 28,000 gallons in oil sales and ongoing flushing support from RIG for the facility.

INTRODUCTION

During a new paper machine installation, Graphic Packaging needed support during precommissioning. With resources stretched thin, a one-stop-shop solution for lubrication, flushing, and support of the integrator (Valmet) was preferred.

The Graphic Packaging precommissioning team reached out to the local Exxon Mobil distributor (Vesco Oil) for assistance. Vesco brought in the Mobil Serv|RIG team to handle lubricants, filtration, flushing support, onsite testing, reservoir cleaning, waste oil handling, and service documentation.

RESULTS

Graphic Packaging, Valmet and Vesco all benefited from working with the engineering staff from Mobil Serv and technical experts from RIG. The team quickly mobilized upon award, helping keep the larger project on schedule and reducing required resources from GP. RIG personnel provided full-time flushing support and the project lead to over 28,000 gallons in oil sales.

Lubricants Moved	Gallons
