

Mobil SHC™ 629 helps PT. Indah Jaya Textile Industry Save Over US\$ 2,240 Annually

LMW Comber LK 64 Machine
PT. Indah Jaya Textile Industry
Tangerang, Banten , Indonesia
ExxonMobil customer since 2006

Situation

PT. Indah Jaya Textile Industry operates two LMW Comber LK 64 machines. Lubricated by a third party synthetic oil, the gearbox of the Comber machines were running at a relatively high temperature of 56°C. The oil drain interval was also unsatisfactorily clocked at 3,000 hours.

Recommendation

The ExxonMobil Lube Engineer analyzed the situation and recommended **Mobil SHC™ 629**, an exceptional performance gear and bearing oil. Further technical advice and support were provided by the **SignumSM Oil Analysis** program.

Result

After deploying **Mobil SHC 629**, an annual savings of US\$ 2,240 has been achieved. The benefits resulted from:

- Extension of the oil drain interval from 3,000 hours to 6,000 hours
- Reduction of average operating temperature of machines by 9°C

LMW Comber LK 64 Machine
